- c. Use the ARROWS on your remote to highlight "Help," and then press SELECT.

- d. Use the ARROWS on your remote to view the FAQs

Fixing a Black, Blue, or Snowy Screen

Your TV needs to remain on the correct input or channel to watch your DISH service. If your TV is not on the correct input or channel, your TV may display a black, blue, or snowy screen.

- a.** Press the TV button located on the side of your remote. Press INPUT located on the side of your remote to cycle through your TV's inputs.

- OR -

- b.** Cycle through TV inputs by pressing the Input, Source, or TV/Video button on your TV remote or the TV itself.
- c.** Once your TV picture is restored, press the SAT mode button on your DISH remote to ensure you're in the proper mode for controlling your receiver.
- d.** If your issue is not resolved, make sure all of the cables are plugged into to your receiver, TV, and wall.

Troubleshooting:

75% of all technical problems that an agent can help you with can be solved by following these five easy steps:

1. Make sure your DISH remote is in SAT mode.
2. Make sure your TV is on the correct input.
3. Make sure you're on the correct Favorites List.
4. Check for anything obstructing the signal to your satellite dish, such as tree branches, severe rain, or snow build-up. If it is safe to do so, remove the obstruction or wait for it to pass.
5. Reset your receiver by unplugging it from the wall for 10 seconds. Plug it back in and turn it back on.
