

Remote User Guide

dish

Safety Instructions

You must keep safety in mind while using this device. Keep these and any other instructions for future reference.

Observe Warnings: Carefully follow all warnings on the device and in the operating instructions.

Heat: Do NOT place the device near heat sources such as radiators, stoves, heat registers, or other appliances that produce heat.

Care and Use

Cleaning: Do NOT use liquid, abrasive, solvent, or aerosol cleaners. Use a damp cloth for cleaning.

When Not in Use: Remove the batteries if this device is to be left unattended or unused for a long period of time.

Refer servicing to qualified personnel when a solid object or liquid has fallen onto or into the device.

Do NOT attempt to service this device. Refer all servicing to qualified personnel. Opening covers other than the battery cover will void the warranty.

Configuring the 20.1 Remote

The 20.1 remote does not require any configuration. Go to *Insert the Batteries* (page 2).

Configuring the 21.1 Remote

Complete the following steps to configure your remote.

Pull the remote battery cover off.

Decide whether to use IR or UHF signals for the remote. Use UHF signals if you do not have a clear line of sight between the remote and the receiver.

Set UHF/IR SWITCH to either UHF or IR. If your remote has a blank, black key, continue to *Insert the Batteries* on page 2.

If your remote shows a "1" or a "2" on the bottom, you can pull out this key and flip it to the other number (2 to 1 and 1 to 2). To separate the key from the remote, insert your thumbnail or a coin in the crease. Remove the key by grasping at the bottom.

Insert the key you wish to use to designate the remote and slide into place. Usually a 1 = TV1 and a 2 = TV2. For remotes showing the blank, black key, leave this key as it is.

Continue to *Insert the Batteries* on page 2.

Insert the Batteries

1

Pull the remote battery cover off.

2

Insert 4 AAA batteries, making sure to match the plus (+) ends with the plus markings on the battery case.

3

Replace the remote battery cover.

Using System Wizard

Note: Not all receivers support System Wizard. If System Wizard does not appear, continue with page 4 or page 5 to make your remote work with your receiver.

Use System Wizard initially to set up the remote to work with the receiver. System Wizard can also store/restore your remote settings. **Note:** If your batteries are low, replace them before beginning.

1

Press and hold 0 until System Wizard message appears. Make sure the remote and receiver are in line of sight.

2

If first time in System Wizard, follow instructions provided.

When green checkmark displays, select **Advanced** to store/restore remote settings.

3

Follow the on-screen options.

4

Select **Continue** to return to Live TV.

Making 20.1 and 21.1 IR Remote Work with Receiver

For 20.1 and 21.1 IR

Use the following instructions to configure your remote while using IR signals.

Note: Use these instructions if your receiver does not support System Wizard.

1

Turn your receiver and TV on, and press **SYSTEM INFO** on the front of the receiver.

2

Confirm that you see the **System Info** screen.

3

Press **RECORD** on your remote. The receiver then matches the remote's address.

4

Confirm that your remote operates your receiver by pressing remote buttons.

If this is not working, go back to step 3.

Making 21.1 UHF Remote Work with Receiver

For 21.1 UHF

Use the following instructions if you have configured your remote to use UHF signals.

Note: Use these instructions if your receiver does not support System Wizard.

1

Verify the UHF antenna is installed on the back of the receiver.

2

Turn your receiver and TV on, and press SYSTEM INFO on the front of the receiver.

3

Confirm that you see the **System Info** screen.

4

Press RECORD on your remote. The remote address will probably change on the screen.

5

Confirm that your remote operates your receiver by pressing remote buttons. If this is not working, go back to step 4.

SAT Mode

SAT

To use the features described in this section, make sure you are in SAT mode by pressing the SAT Mode button.

Note: Some features may not be available depending on your receiver model.

TV Mode

TV

To use the features described in this section, make sure you are in TV mode by pressing the TV Mode button. Remote programming is required.

Note: Some features may not be available depending on your receiver model.

DVD Mode

DVD

To use the features described in this section, make sure you are in DVD mode by pressing the DVD Mode button. You can use this mode to operate a Blu-ray Disc™ player or VCR. Remote programming is required.

Note: Some features may not be available depending on your receiver model.

Press this button for DVD Mode

Power & TV Power

Top button turns the DVD player/VCR power on and off
Bottom button turns the TV on and off

Input

Switch VCR between its TV and VCR mode

Up/Down Arrow Buttons
Channel up/down on VCR

Back

Rewind a videotape or reverse a DVD

Stop

Stop playing a DVD, stop playing or recording a videotape

Record

Record on a videotape

Pause
Pause a videotape or DVD

FWD
Forward a videotape or DVD

Play
Play a videotape or DVD

Number Buttons
Enter a channel number for DVD

DVR Functions

DVR

Press twice to go to the list of recorded programs.

PLAY

Plays a live or recorded program.

Pauses a live or recorded program.

STOP

Stops recording a program.

RECORD

Records a program.

BACK

Press BACK once to reverse the program four times as fast as normal play. Press BACK twice to reverse at 15 times normal speed, three times to reverse at 60 times normal speed, and four times to reverse at 300 times normal speed. The on-screen bar shows how far you've gone. For a live program, you can only reverse back to the last channel change or back one hour, whichever occurs first.

SKIP
BACK

Press SKIP BACK to skip back about 10 seconds in a program.

FWD

Press FWD (Forward) once to fast-forward through the program four times normal speed. Press FWD twice to forward at 15 times normal speed, three times to forward at 60 times normal speed, and four times to forward at 300 times normal speed. The on-screen bar shows how far you've gone. Of course, you cannot forward into the part of a live program that has not been broadcast yet.

DVR Functions, continued

SKIP
FWD

Press SKIP FWD to skip ahead about 30 seconds in the program.

Press PAUSE and then press BACK to reverse the program in slow motion at 1/4 the speed of normal play. Press BACK again to reverse at normal speed.

BACK

FWD

Press PAUSE and then press FWD to forward the program in slow motion at 1/15 the speed of normal play. Press FWD twice to forward at 1/4 as fast as normal play. Press FWD three times to play the program. Of course, you cannot forward a live program that has not been broadcast yet.

SKIP
BACK

Press PAUSE and then press SKIP BACK to reverse the recording frame-by-frame.

SKIP
FWD

Press PAUSE and then press SKIP FWD to advance the recording frame-by-frame.

Programming Remote to Control Another Device

Entering a Code

1

Turn the device and receiver on.

2

Find the brand name of the device listed in the code tables that start on page 29.

3

Press and hold the correct Mode button until all Mode buttons light up and release the Mode button. Mode button flashes.

For AUX Mode only.

Press

- 0 for second TV
- 1 for a second DVD/VCR/BD
- 2 for a tuner, amplifier, or audio receiver
- 3 for a second satellite receiver

4

Enter one of the three-digit device codes from the table found in step 2, using buttons on the number pad, such as device code 560. Press 1 after the device code if you want to program Limited Mode. See *Placing Remote in Limited Mode* on page 15 for more information.

Programming Remote to Control Another Device

Entering a Code, continued

5

Press POUND (#). The Mode button flashes three times.

6

Press POWER to test if the code works for the device. If it does, the device turns off.

7

Turn device on and try other buttons to make sure the device responds the way you expect. If you want to try another code, begin from step 1 again.

8

If you are unable to find a code that works or if all the keys are not supported, go to *Learning From Another Device's Remote* on page 24 to program the key to the DISH remote.

If you are unable to find a code that works, try the instructions for *Scanning the Remote Database* on page 13.

Programming Remote to Control Another Device

Scanning the Remote Database

Note: Only use *Scanning the Remote Database* if you are unable to find a code using *Entering a Code*. This procedure can take several minutes.

1

Turn the device and receiver on.

2

Press and hold the correct Mode button for the device until all Mode buttons light up. Release the Mode button. The Mode button flashes. If programming TV or DVD Mode buttons, go to step 4. If programming AUX Mode button, continue to step 3.

3

For AUX Mode only. Press

- 0 for second TV
- 1 for second DVD/VCR/BD
- 2 for tuner, amplifier, or audio receiver

Press the STAR  button

Press POWER.

4

5

Pointing the remote at the device the entire time, press and release UP ARROW slowly. The Mode button light goes out and comes back on. When the device turns off, continue to step 6. If the device remains on, continue pressing UP ARROW. When all codes have been tried, the Mode button flashes eight times. Try *Learning From Another Device's Remote* on page 24.

6

Press POUND (#). The Mode button flashes three times.

7

Turn the device on and try other buttons to make sure the device responds the way you expect. If not, try another code by returning to step 1.

Displaying Device Code and Remote Address

To identify the device code that your remote control is using or to display the remote control address, complete the following steps:

1

Press and hold the Mode button for the device until all the Mode buttons light up and then release. The selected Mode button flashes.

To display the remote control address, press and hold SAT until all the Mode buttons light up and then release. SAT flashes.

2

Press and release POUND (#) twice.

3

The Mode button flashes a number of times corresponding to the value of the stored device code. If Limited Mode is used, the last flash represents Limited Mode.

For example, if the stored device code is 593, the Mode button flashes five times, pauses, flashes nine times, pauses, and flashes three times. A quick flash is for zero.

If SAT was pressed to display the remote address, the SAT Mode button flashes 1 to 28 times, giving the remote address.

For AUX mode: The first group of flashes tells you what the AUX mode controls, then the following flashes tell you each digit of the device's code.

- 0 for second TV
- 1 for second DVD/VCR/BD
- 2 for tuner, amplifier, or audio receiver

4

(Optional)

Record the stored device code in the Reference Table on the inside back cover.

Placing Remote in Limited Mode

Limited Mode locks out all the device mode operations except for the device's POWER, MUTE, and VOLUME. This prevents you from accidentally tuning away from satellite programming.

If TV is put into Limited Mode, when TV is pressed, the remote does not stay in TV mode but returns to the last mode selected. To remove Limited Mode from TV, follow the steps below.

To place the remote in Limited Mode or to remove Limited Mode from TV Mode, follow the steps below.

Note: Limited Mode cannot be used with audio amplifiers.

1

Press and hold the TV , DVD , or AUX  Mode button until all four Mode buttons light up.

2

Press PAGE UP to activate.

Press PAGE DOWN to take the remote out of Limited Mode.

3

Press POUND (#).

SAT Auto-Tune

SAT Auto-Tune programs into the remote control the correct TV channel used for watching TV. If you are experiencing fuzzy, snowy, blue, or black screens, it might be due to the TV being set to the wrong channel. Using the SAT Auto-Tune feature helps prevent these screen issues from occurring on TVs connected to the receiver's modulated output (usually TV2). Use SAT Auto-Tune to program the correct TV channel for satellite viewing into the remote control. When SAT is pressed and released, the remote sends that channel to the TV, ensuring that the TV is on the correct channel for watching TV.

This feature is enabled by default; however, if you want to use this feature, the channel must be programmed by following the steps in *Setting SAT Auto-Tune Channel*.

Setting SAT Auto-Tune Channel

-  Make sure the remote control operates your TV.
-  Press and hold TV for three seconds until all four Mode buttons are lit.
-  Press STAR (*).
-  Enter the channel used for viewing (two or three digits in range of 002 to 125), for example channel "10" or "010."
-  Press POUND (#). The Mode button flashes three times to indicate programming was successful.
-  Press SAT. The channel changes.

Enabling and Disabling SAT Auto-Tune

Note: SAT Auto-Tune is enabled by default; however, the channel must be set (see *Setting SAT Auto-Tune Channel* on page 16).

1

Press and hold SAT for three seconds until all four Mode buttons are lit.

2

Press STAR (*).

3

Press VOLUME UP to enable SAT Auto-Tune or VOLUME DOWN to disable.

4

Press POUND (#). SAT flashes three times to indicate SAT Auto-Tune is enabled or disabled.

Removing SAT Auto-Tune Channel

1

Press and hold TV until all four Mode buttons are lit.

2

Press STAR (*).

3

Enter 00 or 000.

4

Press POUND (#). SAT flashes three times to indicate SAT Auto-Tune is removed.

Setting Auto-Tune for DVD, VCR, or BD

You can set Auto-Tune for your DVD, VCR, or Blu-ray Disc™ player. Auto-Tune allows you to return to the channel for your DVD/VCR/BD output when you accidentally change the channel or video input.

Note: This feature is only used while recovering your picture. See *Recovering Your Picture* on page 20.

1

Make sure the remote control operates your DVD/VCR/BD.

2

Press and hold DVD for three seconds until all four Mode buttons are lit.

3

Press STAR (*).

4

Enter the channel used for viewing (two or three digits in range of 002 to 125), for example channel “03” or “004.”

5

Press POUND (#). The Mode button flashes three times to indicate programming was successful.

Removing Auto-Tune for DVD, VCR, or BD

If you want to remove Auto-Tune for your DVD/VCR/BD, follow the steps below.

1

Press and hold DVD until all four Mode buttons are lit.

2

Press STAR (*).

3

Enter 00 or 000.

4

Press POUND (#).

Recovering Your Picture

Use the RECOVER button to get back to watching satellite programming if you accidentally change channels or inputs on your TV, DVD, and/or VCR. To use this feature, you must set up Auto-Tune for your TV (see page 16) and for your DVD/VCR (see page 18).

Note: RECOVER only works if the remote control has been set up to control the TV and/or DVD/VCR, if connected. If the RECOVER button is used, the TV channel programmed for SAT Auto-Tune is also the channel that is sent to the TV. If SAT Auto-Tune is not programmed, RECOVER first tries to tune your TV to channel 3, then channel 4, and then other video inputs with each press of the RECOVER button. If SAT Auto-Tune is programmed, RECOVER tries to tune your TV to the channel given in SAT Auto-Tune and then other video inputs with each press of the RECOVER button. You may need to press the RECOVER button up to 30 times to recover your satellite TV video. If SAT Auto-Tune is not set-up, RECOVER only tries channels 3 and 4.

1

Press and hold RECOVER until all Mode buttons light up.

2

If you see the **System Info** screen, proceed to step 4. Otherwise, continue to step 3.

3

Press RECOVER again and wait until the Mode lights stop flashing. If you see the **System Info** screen, go to step 4. If not, repeat this step until you see the screen.

4

Press SELECT to resume watching TV.

Control Amplifier Volume

When the remote control is set up to operate your TV, the MUTE and VOLUME buttons adjust your TV volume when in SAT mode. To use the remote to adjust the volume of a remote-controllable audio receiver or amplifier instead of adjusting the TV's volume setting, use the steps on this page.

- 1**  Press and hold AUX until all Mode buttons are lit, then release it. The AUX mode button blinks.
 - 2**  Press POUND (#).
 - 3**  Press the plus (+) side of the VOLUME button.
 - 4**  Press the 0 number button.
 - 5**  Press POUND (#). The AUX mode button flashes three times.
- Make sure the remote controls the amplifier's volume in other modes:***
- 6**  Press SAT.
 - 7**  Press the plus (+) and minus (-) sides of VOLUME.
 - 8**  Your tuner/amplifier's volume changes, and the AUX mode button lights.

Control TV Volume

Use this procedure to change from having the remote adjust the volume of an audio receiver or amplifier to having the remote adjust the TV's volume. When the remote control is set up to operate your TV, the MUTE and VOLUME buttons adjust your TV volume when in SAT mode.

Note: It is only necessary to do these steps if the remote had been set up to control the volume on an audio device and now you want the remote to adjust the volume of a TV.

1

Press and hold TV until all Mode buttons are lit, then release it. The TV mode button blinks.

2

Press POUND (#).

3

Press the plus (+) side of the VOLUME button.

4

Press the 0 number button.

5

Press POUND (#). The TV mode button flashes three times.

Make sure the remote controls the TV's volume in other modes:

6

Press SAT.

7

Press the plus (+) and minus (-) sides of VOLUME.

8

Your TV's volume changes, and the TV mode button lights.

Programming Remote to Control Second Receiver in AUX Mode

If you have another DISH receiver installed, you can use this remote control in AUX mode to operate your new receiver. AUX mode uses only IR signals, so the line of sight to the second receiver must be unobstructed. You can program the remote control to operate any other DISH receiver except where UHF is used, such as TV2 on DISH receivers.

1

Turn on the second receiver and open **System Info** screen.

2

Write down the TV1 address that is shown. _____

3

Press and hold AUX until all Mode buttons light up, then release the button. AUX flashes.

4

Use the Number Pad on the remote control to enter a 3, followed by the address in step 2.

5

Press POUND (#). AUX flashes three times.

6

Press RECORD to verify that the address in the remote control now matches the address for the receiver.

Learning From Another Device's Remote

Use this procedure if you are unable to find a code that allows your DISH remote to control your device or if some of the commands are not functioning as you expect after programming your DISH remote to control your device (in TV, DVD, or AUX modes). Use this procedure to have your DISH remote learn the commands of the other device's remote control.

The remote control can learn commands in one of two ways:

- You can follow the instructions for using device codes to program a specific mode, and then learn commands that add new or overwrite existing functions of the remote control's buttons in this mode. For this type of learning, any button without a learned command keeps the previous command (if any) for that device code. To program a specific mode, use the instructions for *Entering a Code* on page 11 or *Scanning the Remote Database* on page 13.

or

- Each button on this remote learns a command from the device's original remote control. For this type of learning, any button without a learned command keeps the previous command (if any) for that device code.

Learning can occur only in TV, DVD, or AUX modes. The Mode buttons (SAT , TV , DVD , and AUX ) cannot learn a command. For each Mode button, the POWER button  can be learned to turn the devices associated with that Mode on and off.

Note: The TV Power button  turns the TV on and off in all Modes. It cannot be learned.

Note: The remote times out if a button isn't pressed within 20 seconds. If the remote times out, then the learning process needs to start over again.

Learning from Another Device's Remote, continued

To have the DISH remote control learn specific commands for another device, complete the following steps.

- 1** Ensure the DISH remote control is working with the receiver (see page 4 or 5).
- 2** Place both the DISH remote and the original device's remote control on a flat, stable surface. Point the front of the original device's remote to face the small square (IR window) on the front, left-hand side of the DISH remote, as shown below. The remotes should be no more than 3" apart.

- 3** On the DISH remote, **press and hold** the Mode button you want to use for the device until all the Mode buttons light up (approximately three seconds), and then release it. The selected Mode button flashes continuously.
- 4** To start learning commands for this mode, select one of the following choices:
 - If you've found a code for the device and programmed it into the remote, **press and release** RECALL (the Mode light goes off when RECALL is pressed and comes on when released), then **hold** the RECORD button until the Mode button is lit again (about three seconds). The Mode button remains lit while learning.
 - If the device code has not been programmed for that device or if you are unable to find a code, **press and hold** the RECORD button until the Mode button is lit (about three seconds). The button remains lit while learning.

Learning from Another Device's Remote, continued

5 On the DISH remote, **press and release** the button you want the DISH remote to learn from the original device's remote. The Mode light goes off and comes back on.

6 On the original device's remote control, **press and hold** the button you want learned until the Mode light goes out and comes back on. You may need to press and hold the button on the original remote several times before the DISH remote learns the command.

- If the DISH remote learns the command, the Mode light flashes off and then back on.
- If the Mode light flashes three times or remains lit, the DISH remote did not learn the command.

7 After a button has learned a command successfully, repeat step 5 and step 6 until all commands you want have been learned.

8 **Press and release** one of the Mode buttons on the DISH remote to end the learning sequence. This saves all the commands for that mode and exits learning to return to normal remote control operation.

To cancel learning, do not press any buttons on either remote control for at least 20 seconds. The DISH remote control times out and returns to normal operation.

Note: If the remote control batteries are too low for learning, all the Mode buttons blink quickly eight times. Learning ends without saving learned commands, and the remote returns to normal operation. Change the batteries and begin learning again.

Note: No learned commands are saved if the DISH remote control times out before completion.

Discrete Codes

Discrete On and Off IR-only remote-control commands are used by installers when programming macro commands into universal remotes. Using an On-only or Off-only command is more effective than a toggle On/Off command when trying to ensure the receiver is reliably in one state or the other.

1

Program the DISH remote to the desired remote address (see *Changing the Remote and Receiver Address*, page 28).

2

Hold SAT until all Mode buttons light, then release the button.

3

Press POWER (not TV POWER).

4

Press VOLUME UP for discrete power on. Press VOLUME DOWN for discrete power off.

5

Press any other button when done to end this procedure.

Changing the Remote and Receiver Address

Sometimes the receiver picks up UHF interference from another receiver in the house or even a neighbor's. If you notice that your receiver is changing channels or opening menus but you're not using the remote control, changing the address should fix the problem.

1

Press SYSTEM INFO on the receiver's front panel.

2

Write down the TV2 remote address shown on the **System Info** screen.

3

Press and hold SAT on your remote control for about three seconds, until all the Mode buttons light up, and then release SAT.

4

Add one to the address that you wrote down in step 1, and use the NUMBER PAD to enter that number (between 1 and 28).

5

Press POUND (#).

6

Press RECORD.

7

Press several buttons on the remote to make sure it is working as expected.

TV Codes

TV

This table contains the manufacturer codes for programming the remote control to operate your TV. If your TV brand is not listed or if the codes do not work, the remote may not control your TV. In some cases, codes may operate some, but not all buttons, shown in this guide.

Note: If programming a second TV in AUX mode, press 0 before entering the TV code.

Tuner/Amplifier Codes

AUX

This table contains the manufacturer codes for programming the remote control to operate your tuner/amplifier. If your tuner/amplifier is not listed or if the codes do not work, the remote may not control your tuner/amplifier. In some cases, codes may operate some, but not all, buttons shown in this guide. **Note:** If programming a tuner/amplifier in AUX mode, press 2 before entering the Tuner/Amplifier code.

Combo Codes

The following tables contain the manufacturer codes for programming the remote control to operate combined devices. If your combined device brand is not listed or if the codes do not work, the remote may not control your combined device. In some cases, codes may operate some, but not all, buttons shown in this guide.

TV/VCR Codes

Note: Program the remote control in TV mode using the TV code and then in DVD mode (or in AUX mode—press 1 before entering the VCR code) using the VCR code.

Troubleshooting

Use this information if you have a problem using the remote. To solve a particular problem, do the following:

- Find the information that relates to the problem you are experiencing. Try the suggested solution for that problem.
- Make sure your remote control has fresh batteries. If you see the Remote Battery Low warning on your TV screen, it is time to change the batteries. Follow the instructions on page 2.
- Make sure you have a direct line of sight between the remote and the receiver.
- Visit ***www.mydish.com***.

While performing a remote control procedure, the remote control stops working.

What to do: Start over again. If you don't press a button for 20 seconds in a programming sequence, the remote shuts off its programming function.

When you press a button on the remote control, the equipment doesn't do what you expect.

What to do: Point the remote control directly at the TV, with no objects blocking the signal path. The remote control uses IR signals to control the receiver. IR signals travel less than 40 feet and cannot go through walls or other solid objects.

If the batteries are missing or dead, replace them with fresh AAA-size batteries. If the remote has fresh batteries, check whether you put them in correctly. If you didn't, take them out and put them in the right way.

When you try to enter TV programming mode, all the mode LEDs flash.

What to do: Replace the batteries (see page 2).

Troubleshooting, continued

Your remote control does not work well.

What to do: If SAT Auto-Tune has been enabled, press SAT to return to watching TV.

Move your receiver to different locations. For best results, place the receiver as high as possible, above all other equipment in your entertainment center.

There may be IR interference from objects near the receiver.

Your picture is snowy (or black or blue).

What to do: If SAT Auto-Tune has been enabled, press SAT to return to watching TV. Make sure your TV is tuned to the correct channel. You may have accidentally changed the channel on your TV. Check the Reference Table to see what channel your TV is tuned to. Program SAT Auto-Tune to avoid this in the future (see *SAT Auto-Tune* on page 16).

When you press the remote control MUTE or VOLUME button, nothing happens.

What to do: Program the remote to control your TV. See *Programming Remote to Control Another Device* on page 11 or page 13.

The receiver does things even though you haven't pressed any remote control buttons.

What to do: See *Changing the Remote and Receiver Address* on page 28 for instructions to correct the possibility of UHF signals from a neighbor's remote controlling your receiver.

Your remote control isn't working.

What to do: Make sure the remote control is in the correct mode (SAT, TV, DVD, or AUX).

Make sure you are using the correct remote control (TV1 or TV2) for your locations (applicable to multi-room receivers only).

Change the batteries as described on page 2.

If you have a 21.1 remote, check the UHF/IR switch setting as described on page 1.

Troubleshooting, continued

Your UHF Pro remote control does not work well from far away.

What to do: Make sure the UHF antenna is connected to the receiver and not touching anything else.

Vary the angle of the receiver's UHF antenna.

Locate the UHF antenna tip away from other electronics equipment or metal surfaces, even if separated by wooden shelving.

Move the receiver to different locations. For best results, place the receiver as high as possible, above all other equipment in your entertainment center.

Place the UHF antenna outside the entertainment center by using a coaxial cable to connect it to the receiver.

Move any nearby off-air antenna away from the UHF remote antenna. Do not place an off-air antenna on your receiver.

Your PIP (Picture-In-Picture) button isn't working.

What to do: If your receiver isn't in Single Mode, press the MODE button on the front panel (if available).

Verify your receiver has the PIP feature. If your receiver is not PIP capable, contact DISH about upgrading to a receiver with the PIP feature.

Your remote control returns to the previously pressed Mode button every time the TV Mode button is pressed.

What to do: Take the remote control out of Limited Mode, following the instructions on page 15, *Placing Remote in Limited Mode*.

Limited Warranty

This Limited Warranty is a legal document. Keep it in a safe place. Remember to keep your Sales Receipt for warranty service. We will consider any items you return without a copy of the Proof of Purchase to be out of warranty.

This warranty extends only to the original user ("you," "your") of the DISH Network remote control and is limited to the purchase price of the remote control. EchoStar Technologies L.L.C., formerly known as EchoStar Technologies Corporation, and its affiliated companies ("we," "our," "us") warrant this remote control against defects in materials or workmanship as follows.

For one year from the original date of purchase, if we find the remote control is defective subject to the limits of this warranty, we will replace the remote at no charge for parts or labor. We warrant any such work done against defects in materials or workmanship for the remaining part of the original warranty period.

This warranty does not cover installation of the DISH Network System; consumer instruction; physical set up or adjustment of any consumer electronic equipment; remote control batteries; signal reception problems; loss of use of the equipment; unused programming charges due to equipment malfunction; cosmetic damage; damage due to lightning, electrical or telephone line surges, fire, flood, or other acts of Nature; accident; misuse; abuse; repair or alteration by other than our factory service; negligence; commercial or institutional use; improper or neglected maintenance; equipment sold AS IS or WITH ALL FAULTS; equipment removal or reinstallation; shipping damage if the equipment was not packed and shipped in the manner we prescribe; nor equipment purchased, serviced, or operated outside the contiguous United States of America.

REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS YOUR EXCLUSIVE REMEDY. WE SHALL NOT BE HELD LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESSED OR IMPLIED WARRANTY ON THIS DEVICE, NOR FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE RESULTING FROM THE USE OF, OR INABILITY TO USE, THIS DEVICE. UNDER NO CIRCUMSTANCES SHALL OUR LIABILITY, IF ANY, EXCEED THE PURCHASE PRICE PAID FOR THIS DEVICE. EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ON THIS DEVICE IS LIMITED IN DURATION TO THE DURATION OF THIS WARRANTY. WE RESERVE THE RIGHT TO REFUSE TO HONOR THIS WARRANTY IF WE DETERMINE ANY OF THE ABOVE EXCEPTIONS TO HAVE CAUSED THIS DEVICE NOT TO HAVE PERFORMED PROPERLY. THIS WARRANTY SHALL BE VOID IF ANY FACTORY-APPLIED IDENTIFICATION MARK, INCLUDING BUT NOT LIMITED TO SERIAL OR CONDITIONAL ACCESS NUMBERS, HAS BEEN ALTERED OR REMOVED. THIS WARRANTY SHALL ALSO BE VOID IF THE DEVICE HAS BEEN OPENED BY AN UNAUTHORIZED PERSON (with the exception of opening the battery cover).

This warranty gives you specific legal rights which may vary from state to state. Some states do not allow the exclusion or limitations of incidental or consequential damages, or allow limitations on the duration of an implied warranty, so those limitations may not apply to you.

DISH's Exchange Programs

DISH offers two options if you need to replace your remote control—the Advanced Exchange Program and the Post Receipt Exchange Program.

Advanced Exchange Program

The advanced Exchange Program allows you to have a replacement remote shipped immediately to you. Depending upon where you live, the remote should arrive within three to five business days. You will not have to return your defective remote to DISH using this program.

A shipping charge will be applied for shipping the replacement remote. This is a one-time fee based on DISH's competitive bulk shipping rates (additional charges may apply outside the continental U.S.). This fee will be charged to your billing account or valid credit card.

Post Receipt Exchange Program

The Post Receipt Exchange Program does require that you send the defective remote control at your cost to DISH to determine if the equipment is covered under warranty. To provide faster service, upon receipt of your equipment, you will be shipped a replacement. Your original equipment will not be available for return.

If your equipment is not covered under warranty and can be repaired, your billing account or credit card will be charged the standard repair fee for the replacement. If damage to the defective equipment is found, which DISH in its sole discretion determines has voided the warranty or makes the equipment unrepairable, your billing account or credit card will be charged the market price of the replacement.

Accessory Warranty

An accessory is any DISH branded equipment, displaying the DISH logo, excluding the receiver, Smart Card, cables and hookups, and non-mechanical components. A one-year warranty becomes effective upon the activation of the DISH system or date of purchase, if bought separately. A proof of purchase is required to verify the purchase date. If an accessory has an expired warranty, no exchange will be issued. You may purchase replacement accessories from DISH or your local retailer.

If You Need Help

1. Review this *User Guide*.
2. See *Troubleshooting* on page 55.
3. Visit **www.mydish.com/chat** for 24/7 support.
4. Call the Customer Service Center at **1-800-333-DISH (3474)**.

Regulatory Factors

This device complies with Part 15 of FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by following one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Do not make changes or modifications to this equipment. This could void the user's authority to operate the equipment.

If none of the remedies stops the radio interference, you should contact a licensed radio/television technician, your satellite dealer, or call the Customer Service Center at 1-800-333-DISH (3474) for assistance.

Reference Table

Write down your remote address, channel numbers/inputs, TV, VCR, DVD player, and stereo equipment codes as you program them for future reference.
